October 21, 2025

Dear Parents and Guardians,

The health and safety of our students, staff, and families remain a top priority for the Salmon River Central School District. In accordance with New York State Department of Health regulations (10 NYCRR Subpart 67-4), the District recently completed required lead testing of water outlets at the St. Regis Mohawk School and the Salmon River Elementary, Middle and High School.

We are pleased to share that **all water samples tested below the State's action level for lead**. This means that no outlets require remediation, and all water sources are safe for consumption and daily use. Testing was conducted by a certified environmental laboratory following all state protocols.

A full copy of the laboratory report is available for review on our district website at www.srk12.org or by contacting the District Facilities Office at (518) 358-6690.

At Salmon River, we take great Shamrock PRIDE in providing a safe, supportive, and nurturing environment for all students and staff. Our facilities team works diligently to ensure that every aspect of our school environment—from our classrooms to our water quality—reflects our commitment to excellence and care for our community.

Thank you for your continued support as we work together to uphold our Shamrock values and maintain the health and well-being of all members of our Shamrock community.

Sincerely,

Dr. Stanley Harper
Salmon River Central School District
